

Directions to the Office

(1) Take I-75 North to Exit 20, which puts you on the Highway 64 Bypass (APD 40) heading East.

(2) Continue east on APD 40* for roughly 7-8 miles and then get on the exit for Ocoee/ Highway 64 East on your right (there is no exit number).

Note: If you wind up at a traffic light at Julian Drive, you have gone too far down APD 40.

(3) Stay straight on Highway 64 East for approximately 34 miles. You will go through the Ocoee River gorge along the way.

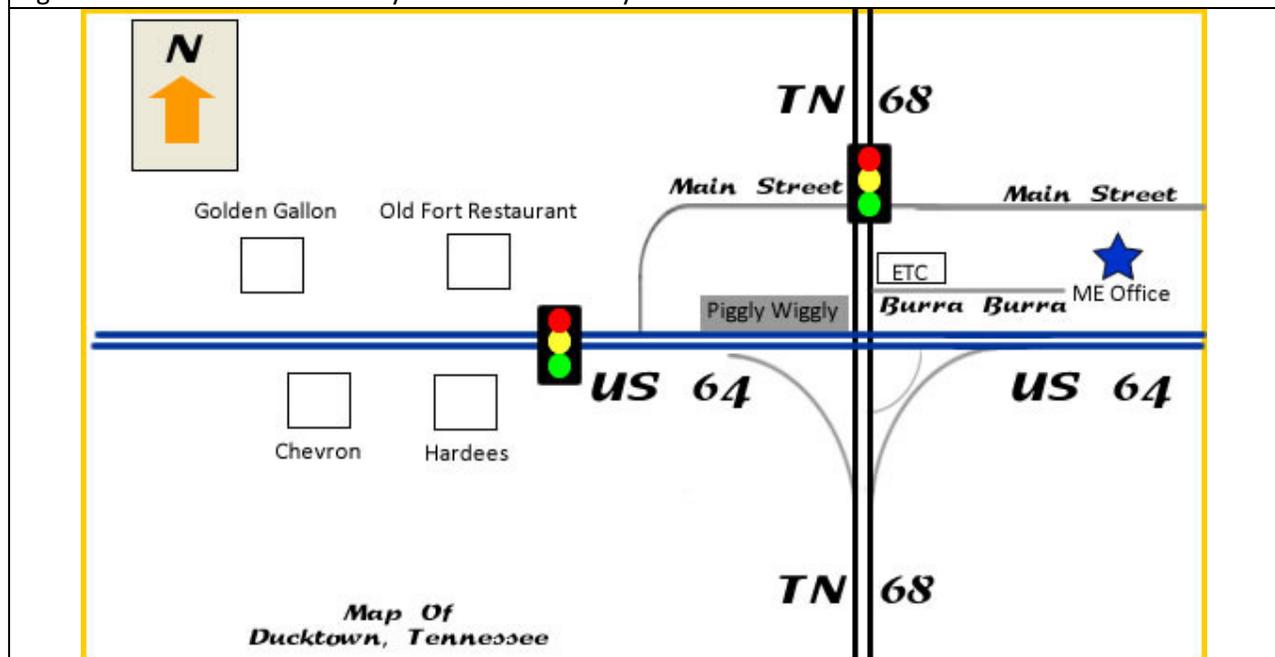

(4) Upon coming into Ducktown you will see a Hardees and a Chevron on your right; and an overpass just ahead. You will want to get on that overpass (Hwy 68) heading north by driving under it and then looping on the ramp immediately to your right. Note: If you see a High School and a Hospital on your right shortly after exit, you are heading the wrong way (south).

(5) After looping on to Hwy 68 North, cross the bridge and then turn at the first MARKED road on your right (Burra Burra Street).

Note: ETC Telecom is at the corner of 68 and Burra-Burra, so that's where you'll turn.

(6) After turning RIGHT on Burra Burra, go all the way to the top of the hill. Upon "topping" the hill, you will immediately see a two-story white house with a Mountain Escapes sign at the curb. That is the ME office.

*Note: There is a Wal*Mart Supercenter on the Highway 64 Bypass/APD-40 near the Dalton Pike traffic light. This is the last Wal*Mart you will see before you arrive in Ducktown.

Some Important Advice About Getting Here...

- (1) You may elect to use internet mapping services and/or GPS in conjunction with these directions, but please take these directions as the ultimate authority in getting here from your departure point.
- (2) If you have multiple parts of your group arriving at different times, please let us know...we will be happy to make arrangements!
- (3) If you plan on getting in late, it's a good idea to come with what "you need" for the evening., because most stores are not open 24 hours in our area.
The highlighted asterisk *explains where the last Wal*Mart is you'll see upon coming in.
- (4) Use your trip odometer! That takes some of the guesswork out of driving, especially from the office to the cabin.
